

SITE-WIDE INTERNATIONALIZATION (i18N) ROLLOUT PLAN

Comprehensive Component Inventory, Master Schema Architecture, and External Data Handling Strategy for English & Tamil Localization

FRAMEWORK STACK

React 19 + Vite + Tailwind v4

I18N ENGINE

react-i18next + i18next

TARGET LANGUAGES

English (en) & Tamil (ta)

EXECUTION STATUS

Stage 2: Schema & Inventory Audit

Executive Overview & Milestones

The core i18n infrastructure has been successfully initialized (via `src/i18n.ts` and `src/main.tsx`) with the primary navigation header (`src/components/Navbar.tsx`) fully localized and featuring a responsive language toggle (English / தமிழ்).

This technical report provides a comprehensive, site-wide translation rollout plan across all 15 remaining public components, modals, and dynamic data structures. In compliance with project guidelines, this document represents an architectural specification without executing source changes or git commits.

PART I: COMPONENT INVENTORY & REFACTORING SCOPE

15 TARGET MODULES AUDITED

Every file in `src/components/` and `src/data/` was scanned for hardcoded English strings. The table below details each module, its functional role, the extracted string categories, and its assigned translation namespace.

Component File	Namespace	Hardcoded Elements to Refactor	Priority & Scope
Hero.tsx	hero	Top verified brand tag, main heading ("Trusted Chit Investment Plans"), subtitle, CTAs ("View Chit Plans", "Contact Us", "Chat on WhatsApp"), trust signals (21-Month Plans, Managed by Elite Turf), denomination cards header & labels, credentials block, and bottom enquiry CTA.	HIGH • Above-the-fold
TrustStrip.tsx	trustStrip	Trust metric labels: "Company", "Business", "CIN Reference", "Operating Entity", and "Verified" badge.	LOW • Static Labels
ChitPlansSection.tsx	plans	Header badge, section title, intro paragraph, 3 tab toggles ("Interactive Plan Cards", "Full 21-Row Official Table", "Contribution Options"), filter pill labels ("Filter Value:", "All Plans"), card highlights, table column headers ("Auction / Month", "Installment"), catalog search placeholder, and contribution matrix headers.	CRITICAL • Core Commercial
CalculatorSection.tsx	calculator	Explorer badge, heading ("CHIT PLAN CALCULATOR"), explanatory copy, step 1 prompt, 3 breakdown box headers ("Contribution Cycle", "Catalog Take-Home Progression", "Structured Benefits"), frequency labels ("Monthly:", "Weekly:", "Daily:"), milestone labels, and CTA button.	HIGH • Interactive Math
HowItWorksSection.tsx	howItWorks data.steps	Path badge, heading ("HOW IT WORKS"), subtitle, step card numbers ("Step 1-5"), bottom assurance tag ("Procedural Clarity"), bottom help card ("Have questions about subscription or auction cycles?"), and CTA button ("Start Registration").	MEDIUM • 5 Process Steps
WhyChooseSection.tsx	whyChoose data.benefits	Section badge, heading ("WHY CHOOSE ELITE GROUP?"), subtitle, card badges ("Standard of Service", "01-07"), and personalized assistance highlight card with direct phone coordinates.	MEDIUM • 7 Benefit Cards
AboutSection.tsx	about	Section badge ("Company Background"), heading, 3 narrative company story paragraphs, credentials card labels (CIN, Operating Entity, Direct Contact Lines, procedural assurance), and 6 core commitment value cards.	MEDIUM • Rich Text Content
FaqSection.tsx	faqs data.faqs	FAQ badge, heading ("FREQUENTLY ASKED QUESTIONS"), subtitle, bottom question banner ("Still have more specific questions?"), WhatsApp button, and enquiry modal button. (Questions and answers mapped from dynamic data).	MEDIUM • 10 Accordions
ContactSection.tsx	contact	Inquiries badge, heading, subtitle, form labels ("Full Name", "Mobile Number", "Email Address (Optional)", "Interested Chit Plan", "Preferred Contact Method", "Your Message"), placeholders, validation alerts, success screen, office address details, and business hours.	HIGH • User Conversion Form
Footer.tsx	footer	Company brand overview blurb, corporate identity tags, "Quick Navigation" section header, "Office & Support" block, statutory regulatory disclaimer text, copyright statement, legal modal links, and "Top" scroll button.	MEDIUM • Global Footer

Component File	Namespace	Hardcoded Elements to Refactor	Priority & Scope
EnquiryModal.tsx	modals.enquiry	Modal header ("Quick Chit Enquiry"), subheader, form fields, plan options dropdown, submission state feedback, error messages, and direct WhatsApp notification action link.	HIGH • Lead Generation
LegalModals.tsx	modals.legal	Modal titles ("Terms & Conditions", "Privacy Policy", "Legal & Regulatory Disclaimer"), statutory notice callout, structured regulatory clauses, and close buttons.	MEDIUM • Legal Compliance
WhatsAppFloatingButton.tsx	modals.floatingWhatsApp	Floating tooltip bubble ("Chat With Us", "Quick answers about chit plans on WhatsApp"), and floating pill button label ("WhatsApp Chat").	LOW • Floating Widget
AdminLoginModal.tsx	modals.adminLogin	Header ("Admin Portal Access"), subheader, input label ("Admin Access Password"), placeholder, submit button ("Authorize & Enter Portal"), and security disclaimer note.	LOW • Auth Overlay
BrandLogo.tsx	nav & hero	Tagline text ("Trusted Chit Investment Plans") and sub-label ("Managed by ELITE TURF").	LOW • Visual Brand
chitPlansData.ts	data	Contains raw source arrays for HOW_IT_WORKS_STEPS, WHY_CHOOSE_ITEMS, CHIT_PLANS_SUMMARY, and FAQs. Requires key-based schema mapping to avoid duplicating immutable numerical data.	CRITICAL • Data Pipeline

PART 2: EXTERNAL DATA HANDLING STRATEGY (CHITPLANSDATA.TS)

ARCHITECTURE
SPECIFICATION

A frequent pitfall in internationalization is duplicating complex data structures or translating numeric financial models. In `chitPlansData.ts`, we have strict statutory financial calculations (such as the 21-row auction catalog, contribution matrices, phone numbers, and CIN).

1. Principles of Separation: Data vs. Presentation

IMMUTABLE
CORE

Numerical figures (e.g., ₹50,000 to ₹5,00,000, 21 installments, phone numbers, CIN: U72900MH1995PLC095642, and the 21-row auction progression table) remain **immutable and centralized** in TypeScript. They are never duplicated into language JSON files.

2. Semantic Translation Keys in Data Structures

DYNAMIC
POINTER

For items requiring localization (FAQ questions/answers, step titles, benefit descriptions), we introduce semantic keys (e.g., key: `'step_1'`) or utilize sequential index lookups (e.g., `t('data.steps.' + step.stepNumber + '.title')`).

Specific Implementation Patterns for Data Sets

Dataset / Structure	What Stays in <code>chitPlansData.ts</code>	What Moves to <code>en.json</code> / <code>ta.json</code>	Rendering Pattern in Component
OFFICIAL_CHIT_CATALOG (21 rows × 6 plans)	Row numbers (sNo: 1-21), numeric auction payout values (e.g., '43,500', '87,000').	The single string literal 'Company' in row 1 (translated to நிறுவனம் in Tamil).	<code>val === 'Company' ? t('plans.company') : val</code>
CHIT_CONTRIBUTION_OPTIONS (5 payment tiers)	Chit values (₹50,000), installment counts, numeric calculations.	Table header titles: Daily, Weekly, Monthly, Installment breakdown.	Direct localization of UI headers via <code>t('plans.dailyCol')</code> , etc.
HOW_IT_WORKS_STEPS (5 steps)	Step numbers ('01' to '05'), icon keys, sequential ordering.	title, description, and detail strings moved into <code>data.steps.{1-5}</code> .	<code>t('data.steps.' + parseInt(step.stepNumber) + '.title')</code>
WHY_CHOOSE_ITEMS (7 benefits)	Icon references ('ShieldCheck', 'Eye', etc.), badge IDs ('01' to '07').	title and description strings moved into <code>data.benefits.{1-7}</code> .	<code>t('data.benefits.' + (index + 1) + '.title')</code>
FAQS (10 items)	Category identifiers ('General', 'Process', etc.) and sequential ordering.	All 10 questions and comprehensive answers moved into <code>data.faqs.{1-10}.q</code> and <code>a</code> .	<code>t('data.faqs.' + (index + 1) + '.q')</code> <code>t('data.faqs.' + (index + 1) + '.a')</code>

Key Architectural Advantages

- Single Source of Truth:** If an installment value or administrative contact number changes, it is updated in a single line in `chitPlansData.ts` without altering locale files.
- Type-Safety Preservation:** TypeScript data models remain strictly typed without runtime reflection hazards.
- Effortless Scaling:** Future regional languages (e.g., Telugu, Kannada, or Malayalam) require zero modifications to React components or data files—only the addition of another JSON resource bundle.

Below is the complete, categorized JSON structure containing all extracted English strings from the entire website, grouped logically by component namespace and data structures.

  "faqs": {
    "1": {
      "q": "What is a chit fund?",
      "a": "A chit fund is a traditional Indian financial mechanism that combines regular savings with access to credit. A group of individuals agree to contribute a fixed sum regularly over a set duration into a central pool, which is then made available to members through structured auctions or draws as per the applicable terms."
    },
    "2": {
      "q": "How do the chit plans work?",
      "a": "Members enroll in a designated chit group of a specific value (e.g., ₹50,000 up to ₹5,00,000). Every member contributes their designated installment (monthly, weekly, or daily) for the fixed duration of 21 installments. Each cycle, an auction or draw is conducted to determine the chit recipient according to company terms."
    },
    "3": {
      "q": "What chit values are available?",
      "a": "ELITE GROUP - SS CHIT FUNDS provides 6 structured denominations: ₹50,000, ₹1,00,000, ₹2,00,000, ₹3,00,000, ₹4,00,000, and ₹5,00,000 with multiple contribution options tailored to individual financial plans."
    },
    "4": {
      "q": "How are monthly contributions determined?",
      "a": "Monthly contributions are based on the total chit value divided across the 21-installment schedule, along with any dividend discounts determined by the monthly auction process in accordance with the group agreement."
    },
    "5": {
      "q": "What is the auction process?",
      "a": "In each cycle, members who have not yet taken the chit amount may participate in an auction. The member bidding the acceptable discount or chosen via the established process receives the prize amount after statutory deductions and documentation verification."
    },
    "6": {
      "q": "How can I join a chit plan?",

```

PART 4: REFACTORING SEQUENCE & IMPLEMENTATION ROADMAP

PHASED EXECUTION

When authorized to proceed with development, the site-wide internationalization rollout should be executed in four disciplined phases to maintain zero runtime regressions, continuous build validation, and pixel-perfect design alignment.

Phase 1: Locale Population

FILES & KEYS

1. Replace `src/locales/en.json` with the complete master schema.
2. Create the exact mirrored Tamil translations in `src/locales/ta.json` using formal, culturally authentic Tamil financial terminology.
3. Verify JSON syntax and key parity between `en.json` and `ta.json`.

Phase 2: Core Page Sections

COMPONENTS 1-4

Refactor the top page sections in hierarchical order:

- `Hero.tsx` & `TrustStrip.tsx`
- `ChitPlansSection.tsx` (Cards, Catalog & Contribution views)
- `CalculatorSection.tsx` (Interactive selection & milestones)
- Import `useTranslation()` and bind `t(...)` calls.

Phase 3: Informational & Engagement

COMPONENTS 5-10

Refactor the remaining core sections:

- `HowItWorksSection.tsx` & `WhyChooseSection.tsx`
- `AboutSection.tsx` & `FaqSection.tsx`
- `ContactSection.tsx` & `Footer.tsx`
- Connect data mapping loops to localized keys.

Phase 4: Modals & Polish

OVERLAYS & QUALITY

Localize all interactive overlays and floating elements:

- `EnquiryModal.tsx` & `LegalModals.tsx`
- `WhatsAppFloatingButton.tsx` & `AdminLoginModal.tsx`
- Validate typography line heights with Tamil Unicode glyphs.

Verification & Quality Checklist

- **Zero Git Changes Before Approval:** Working tree modifications remain strictly local without git commits or branch pushes until client review is complete.
- **Tailwind CSS v4 Compatibility:** Font line-heights and button padding must comfortably accommodate Tamil typography without clipping ascenders/descenders.
- **Language Persistence:** Verify that switching language in the Navbar immediately updates `localStorage.getItem('elite_chit_lang')` and updates all sections simultaneously.
- **Vite Production Build:** Run `npm run build` after each component refactor to ensure zero TypeScript errors.
