

# FRONTEND ARCHITECTURE & MULTI-PAGE MIGRATION TECHNICAL OVERVIEW

Comprehensive baseline audit of single-page React framework, component hierarchy, directory taxonomy, and multi-page routing transition roadmap.

Organization: **ELITE GROUP SS CHIT FUNDS**    Operating Entity: **ELITE TURF**    CIN: **U65992TZ2021PTC035412**

Location: **Mettupalayam – 641104, TN**    Status: **Pre-Migration Audit**

## I. FRAMEWORK & ROUTING ANALYSIS

Baseline Evaluation

The web platform is currently structured as a single-page application (SPA) created with the latest React runtime and bundled via Vite. Below is the verified dependency footprint extracted from `package.json`:

### Frontend Framework

**React 19** (react: ^19.0.1, react-dom: ^19.0.1)  
Uses modern functional components, hooks (useState, useEffect), and client-side DOM reconciliation.

### Bundler & Styling Engine

**Vite 6.2** with **Tailwind CSS v4**  
Fast HMR dev server via @vitejs/plugin-react: ^5.0.4 and @tailwindcss/vite: ^4.1.14 with responsive mobile typography safeguards.

### Routing Library Status: NONE INSTALLED.

There is currently **no router package** (e.g., react-router-dom, @tanstack/react-router, or Next.js App/Pages router) installed in `package.json`.

- **Current Navigation Mechanism:** Single-page anchor smooth scrolling via `window.scrollTo` targeting element IDs (`#home`, `#about`, `#chit-plans`, `#calculator`, etc.).
- **View Mode Switcher:** Binary state switcher in `App.tsx` (`viewMode === 'public' ? <Landing /> : <AdminPortal />`) paired with URL hash detection (`#admin`).
- **Requirement for Multi-Page:** Installing `react-router-dom` (v6/v7) is the recommended path to enable independent URL routes (e.g., `/calculator`, `/chit-plans`, `/about`) with dedicated URLs and metadata.

└── types.ts # TypeScript domain interfaces
```

Data & State Isolation

All financial metrics, 21-tier schedules, and FAQs are central in `chitPlansData.ts`, enabling easy extraction into independent page views.

Service Layer

Lead generation (`enquiryService.ts`) and admin authentication (`adminAuthService.ts`) are decoupled from UI components.

### 3. MAIN PAGE BREAKDOWN ( `SRC/APP.TSX` )

Execution Order

The application's single landing page is defined in **src/App.tsx** (bootstrapped by **src/main.tsx**). In public view mode, all 9 child content sections are sequentially stacked inside the `<main>` element:

| # | CHILD COMPONENT                          | TARGET SECTION ID          | PRIMARY FUNCTIONAL ROLE                                                                                                            |
|---|------------------------------------------|----------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <code>&lt;Hero /&gt;</code>              | <code>#home</code>         | Primary value proposition headline, dual CTAs ("Explore Plans" & "Calculate Returns"), quick denomination ticker pills.            |
| 2 | <code>&lt;TrustStrip /&gt;</code>        | Inline strip               | CIN registration badge, Mettupalayam operating headquarters notice, disciplined savings trust indicators.                          |
| 3 | <code>&lt;ChitPlansSection /&gt;</code>  | <code>#chit-plans</code>   | Interactive catalog view switcher, official 21-tier schedule table, 5-tier quick summary table, and plan cards.                    |
| 4 | <code>&lt;CalculatorSection /&gt;</code> | <code>#calculator</code>   | Interactive plan selector (₹50K–₹500K), installment projection calculations, estimated auction payout & dividend progression.      |
| 5 | <code>&lt;HowItWorksSection /&gt;</code> | <code>#how-it-works</code> | 5-step visual guide: Enrollment, Monthly Contributions, Procedural Auctions, Dividend Sharing, and Prize Payouts.                  |
| 6 | <code>&lt;WhyChooseSection /&gt;</code>  | <code>#benefits</code>     | 7 corporate commitments including legal security, dual WhatsApp coordination, zero hidden charges, and local Mettupalayam backing. |
| 7 | <code>&lt;AboutSection /&gt;</code>      | <code>#about</code>        | Full corporate profile, ELITE TURF management context, corporate CIN validation, and trust pillars.                                |
| 8 | <code>&lt;FaqSection /&gt;</code>        | <code>#faq</code>          | 10 collapsible FAQ accordions addressing documentation, payment modes, bidding limits, and auction rules.                          |
| 9 | <code>&lt;ContactSection /&gt;</code>    | <code>#contact</code>      | Dual direct phone lines (+91 7338736352 & +91 9345836032), Google Maps embed, and interactive lead enquiry form.                   |

4. SHARED LAYOUT ELEMENTS & PERSISTENT OVERLAYS

Universal UI

1. Universal Header ( `Navbar.tsx` )

**Sticky High-Density Navigation:** Top utility bar (CIN, direct phone links, WhatsApp, Admin Portal trigger), brand logo, navigation links, and responsive drawer menu.

2. Universal Footer ( `Footer.tsx` )

**Corporate Closure & Compliance:** Corporate profile, CIN badge, quick navigation, office address & phone numbers, statutory compliance disclaimer, copyright notices, and legal modal triggers.

3. Persistent Floating Widget ( `WhatsAppFloatingButton.tsx` )

Fixed at bottom-right (z-40) with dismissible tooltip bubble ("Chat With Us") opening official WhatsApp chat directly.

4. Universal Modal Layer

Mounted conditionally at root level: `EnquiryModal` (lead capture), `AdminLoginModal` (admin auth), and `LegalModals` (Terms, Privacy, Disclaimer).

5. MULTI-PAGE ARCHITECTURE RESTRUCTURING ROADMAP

Proposed Transition

When restructuring into a multi-page site, each section is extracted into a dedicated route component under a common `<Layout>` wrapper with `react-router-dom`:

| TARGET ROUTE  | PAGE TITLE      | MIGRATED COMPONENT(S)                                                                     | SEO & USER EXPERIENCE BENEFIT                                                   |
|---------------|-----------------|-------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
| /             | Home            | <code>&lt;Hero /&gt;</code> , <code>&lt;TrustStrip /&gt;</code> , <code>Highlights</code> | Fast first load, clear value proposition, high-converting overview.             |
| /chit-plans   | Chit Plans      | <code>&lt;ChitPlansSection /&gt;</code>                                                   | Dedicated indexable URL for the official 21-tier schedule and plan comparisons. |
| /calculator   | Plan Calculator | <code>&lt;CalculatorSection /&gt;</code>                                                  | Focused financial tool page without scrolling distractions.                     |
| /how-it-works | How It Works    | <code>&lt;HowItWorksSection /&gt;</code>                                                  | Clear educational onboarding guide for new subscribers.                         |
| /benefits     | Why Choose Us   | <code>&lt;WhyChooseSection /&gt;</code>                                                   | High-trust credibility page highlighting regulatory compliance.                 |
| /about        | About Us        | <code>&lt;AboutSection /&gt;</code>                                                       | Company leadership, CIN verification, and corporate history.                    |
| /faq          | FAQ             | <code>&lt;FaqSection /&gt;</code>                                                         | Comprehensive knowledge base; ranks for common user search queries.             |
| /contact      | Contact Us      | <code>&lt;ContactSection /&gt;</code>                                                     | Dedicated location page with interactive Google Maps and enquiry form.          |
| /admin        | Admin Portal    | <code>&lt;AdminPortal /&gt;</code>                                                        | Protected administrative dashboard with dedicated URL routing.                  |
